

Using LEGO® therapy as an intervention

Course Code: 1616/18/24

“Getting your head above the crowd.”

Using LEGO® therapy as an intervention

Suitable for: All staff that work with children, young people

What is Lego therapy?

- A social development programme
- Collaborative play based intervention where children work together to build Lego models
- Supports joint attention, shared goals, social communication and interaction
- Common purpose and shared interest in Lego
- Emphasis can be tailored to the needs of the group

Who will Lego therapy interventions help?

- Children with other social interaction difficulties
- Anxiety disorders
- Depression
- Difficulties engaging with peers or adults.
- Shy or will not actively seek out interaction with others.
- Poor or low levels of language ability.

Lego therapy can also help EAL pupils with learning an additional language

In this experiential afternoon course Nicki will cover:

- History, theory and uses of LEGO® therapy
- Room set up, resources and practical tips
- Delegates will gain the confidence and knowledge to set up and use LEGO® as an intervention within their setting
